***New Info on Fall
Protection***

Release Date: Sept. 4, 2018

Issued By: Gary Wetzel

A recent inventory survey was conducted to find the most common type of fall protection (full body harnesses, lanyards) that are in use on Fieldwood Energy's platforms and to arrive at a consistent method of purchasing these. Going forward, the Procurement Group (purchasing, Chris Jouban, James Ramsey, Danielle Taylor, and Bret Stucker) will handle the ordering of full body harnesses, lanyards and other critical equipment. The following fall protection will be available:

- **Harness, MSA Workman, vest, TBLS, std size
PN 1007248.**
- **Suspension Trauma Step (without carabiner)
PN 10063441.**

- MSA Workman Twin Leg Energy-Absorbing Lanyard 6', Tie Back Version, 100% Tie Off. (Y-Type Lanyard) PN 10113162. This lanyard is still available for existing harnesses, however, upon necessary replacement, the Web V-Shock Tie Back Twin is the preferred lanyard.
- PFL Web V- Shock Tie Back Twin PN 64141-00A.
This is a new addition in lanyards. The lanyard is actually two small retractable lifelines with a 9' length, attached to the Workman type full body harness by a carabiner which affords 100% tie-off capability. This lanyard affords better fall protection by employing retractable lifeline capabilities which deploy within inches after activation. This new lanyard has tie-back capabilities which will allow tie-back into the lanyard leg (tie-back to first three (3) feet of sleeve only). **When purchasing the V-Shock Tie Back Twin, the Procurement Group has been instructed to include the Workman Harness and Suspension Step. These will be assembled by Total Safety, so the items will be sent to you already attached. Cost for harness, V-Shock Twin and Suspension Step is approximately \$355.00.**
